Our Brand Promise

The new. The different. The better. Everyone wants that; but with innovation comes uncertainty. Will it work? Will it break, cost me more? Can I trust the company that made the product to stand behind what they sold me?

With innovative products from Westinghouse, you can be confident that the new thing you desire comes with the quality, value and customer support you need. After all, Westinghouse has been making innovative consumer and industrial products for over 100 years.

Westinghouse® Water Refining products all share one thing in common, inventive technologies that simplify the process of water purification while providing long-lasting, reliable performance.

Water. It is essential to all life. So Westinghouse takes the task of purifying it very seriously. Much more than just a water softener or simple taste-enhancing filter, Westinghouse Water Refiners are highly efficient water treatment solutions for the entire home.

Problem...

Today, people face many water challenges. Your water may taste bad, look bad and even feel bad. It may cause a variety of challenges throughout the home that lead to aggravation and expenses. So what can be done about this?

George Westinghouse was known as the greatest inventor of his time by solving common problems with inventive new products that enhance lives. Westinghouse Electric Corporation was founded on this simple principle, and his company continues with this directive to this day.

Today's water - it's a challenge; so Westinghouse once again invented the solution.

Solution...

The Westinghouse Dynamic Series refiner is a whole house water treatment system that offers your family peace of mind with consistent high quality water. It works around the clock ensuring that your entire house receives the trouble-free benefits of refined, clean, soft water. Clothes and linens will be softer, brighter, and last longer. Water spots, scaling of water-using appliances & fixtures, soap scum, and other water quality issues will become distant memories.

The Westinghouse Dynamic Series water refiner delivers safe, clean water with many innovations, delivered in a contemporary stainless steel package. Its combination of EcoFlow regeneration, proportional cleaning, demand metering, and a true-flow media ensures industry-leading conservation of water while extending the life of the filtering medias. The Westinghouse Dynamic Series refiner also utilizes a unique seven-step cleaning sequence, one of which is the most unique - a low electric current sent through two titanium plates producing a decontamination solution.

Westinghouse Refiners are most often provided with a unique filtering media configuration made up of four separate filtration medias.

High Microporosity Granular Activated Carbon

Reduces chlorine, unpleasant taste and odor.

BlackCat® Ion Exchange Media

BlackCat high capacity resin removes more iron and hardness-causing minerals.

Bacteriostat 55

Inhibits bacteria growth and reduces heavy metals.

Garnet Filtration Media

Provides 20 micron sediment filtration and even distribution of water flow.

Innovative Features

EcoFlow - EcoFlow Regeneration refers to the self-cleaning process of the Dynamic Series Westinghouse Refiner. The water flow and regenerant strength is computer controlled in order to maximize the efficiency of the cleaning process.

Unique 7 Step Cleaning Sequence - One of which is the most unique. A low electric current is sent through two built-in titanium plates which cause a molecular reaction creating a special cleansing solution. This decontamination solution effectively inhibits bacteria growth within the media bed.

Refined Cleaning - Refined Water Brining is a feature of the Dynamic Series. Cleaning the system with treated water extends the life of the filtering media and ensures optimum water refining quality and capacity.

Calendar Override - The Calendar Override ensures the refiner is kept in a fresh clean state, even when it's not in use. This feature enables the system to go into regeneration after a predetermined number of days, even if the metered water usage hasn't triggered an automatic regeneration. This is very helpful during periods of non-use or low use.

1" Controller - With a minimum of a 1" Controller & Distributor, Westinghouse whole house refiners enjoy very high flow rates enabling them to keep up with high levels of water usage in the home.

NOVRAM - When your Westinghouse technician installs your new Westinghouse refiner he will program the computer with many water quality and system capacity settings. These settings are stored in NOVRAM - non-volatile memory, just like your home computer. So if the system loses power, even for days, or weeks, no service call will be required to reprogram the system once power is restored.

Backup Capacitor - Speaking of power, all Westinghouse refiners provide their own Capacitor to backup their power should power be lost. Less sophisticated systems require batteries, which inevitably wear out if they aren't changed annually.

Benefits

They say good things don't last, and in the case of many of the things you purchase nowadays - they'd be right! Westinghouse Water Refining Systems can change all that however.

You see, when you treat your whole home to the luxury of refined Westinghouse water, then many other things last and last and last. By removing the detrimental contaminants in your water, all your water using appliances will last much longer. The same goes for your faucets, fixtures and shower heads. Even the surfaces that your water comes in contact with will remain like new. No hard water spots, soap scum or stains - Yahoo!

The lasting doesn't end there either. Your clothes and linens will last longer. Detergents, soaps and cleaners will last longer. Even the cleanliness of your house last longer - Amazing!

Westinghouse Water Refining Systems will enhance your life. How you ask? Glassware comes straight from the dishwasher, crystal clear. No more hard water spots, no more soap residue, the same goes for stemware and flatware.

Slide to the bathroom and you'll experience pure pleasure in the shower and bathtub. Refined Westinghouse water rinses away all soap and cleaning products completely, leaving you with nothing but soft manageable skin and hair. Experience the luxury of a shave in refined water. Razor blades will last longer and shave you closer.

Westinghouse refines your water to the point that your water becomes a powerful solvent - all by itself. That's right, your water can lift stains and clean surfaces. Eliminating tough stains brought on by your old water, combined with the benefit of water that now cleans, not only reduces your cleaning time, but also the need for harsh, sometimes toxic cleaners in your home. Now that's delightful, day after day!

Peace of Mind

Innovation, quality, and value - backed up by the industry's strongest warranty.

Your entire Westinghouse Water Treatment System is covered by a Lifetime Limited Warranty that covers all components for as long as you own your system. Nothing is pro-rated, and no coverage is lost.

See the complete written warranty for full details.
