

# PURE

5 stages alkaline water

## Why **Alkaline** Water?

Alkaline water may help by neutralizing acid in the body, improving hydration, supporting digestion, and providing antioxidant benefits due to its higher pH and mineral content.

## **Reverse Osmosis** Water

Reverse osmosis (RO) water is purified by pushing water through a semi-permeable membrane that removes contaminants like heavy metals, chemicals, and bacteria, leaving clean, safe drinking water.

**9.5+ pH**

**Reverse Osmosis**  
**50 GPD**

**99.999%**  
**Chemicals**  
**Removed**

**Save money**  
**long-term**
